

ADVANTAGE MANUFACTURING

January 1, 2020

Cordova, TN based SG Electronics, Inc. (SGE) is proud to introduce its North American plastic injection molding plant. Through a business acquisition, SGE now offers select engineered plastic components and assemblies from the company's West Tennessee production facility. These new capabilities are in addition to production services from SGE's other long-standing manufacturing partners in Asia.

With enhanced manufacturing capabilities, SGE continues to bring value to its customers that enable them to transact business as effectively as possible. SGE's engineering resources ensure world-class designs, lean manufacturing principles, continuous cost improvement programs, and flexible supply chain solutions to help secure competitive pricing throughout the program life of each product.

For the past 40 years, SGE has offered high quality decorative/functional plastics, rubber and other products to automotive tier 1 and tier 2 suppliers as well as customers in industrial, medical, marine, aviation, packaging, and other industries. For additional information on SGE's new North American production capabilities, contact the business development team of Jason Wright and Chris Stiller, or any member of the SGE engineering team at sales@sgelectronicinc.com
